

“We pride ourselves on impeccable patient care service.”

## Persky Sunder Facial Plastic Surgery

**M**ichael A. Persky, MD, and Sarmela Sunder, MD, provide patients with surgical makeovers such as rhinoplasty, eyelid lift and facelift. Both doctors are dual board-certified facial plastic surgeons. Dr. Persky studied and trained at Emory, UCLA and USC, and Dr. Sunder studied and trained at Johns Hopkins, Cornell and Stanford.

Persky Sunder Facial Plastic Surgery also offers non-invasive procedures such as injectables like Restylane Defyne and Refyne, Juvederm® Volbella and Voluma, Sculptra, Dysport and Botox®, skin-tightening devices Profound Lift™, Ultherapy, Coolsculpting, Fraxel® laser resurfacing, Venus™ Freeze, Viva, and microneedling with Platelet Rich Plasma.

### Tell us about your practice.

“Persky Sunder Facial Plastic Surgery offers

a warm, friendly, professional and discreet environment in which patients can trust our expertise and feel pampered. We pride ourselves on impeccable patient care service and for building long-term patient-provider relationships.”

### What's new in facial plastic surgery?

“Profound Lift is the best non-surgical lifting and tightening device for facial and neck rejuvenation. Restylane® Defyne and Refyne are HA fillers that conform to facial expressions. Juvederm® Vollure can be used almost anywhere on the face. Silhouette Instalift™ uses threads to lift and volumize the face. We have added pain-free ThermiVa® non-invasive vaginal restoration, and hair replacement therapy.”

### Do you ever turn down a patient's request?

“We often tell both new and established

patients when they do not need a treatment—whether it be injectable fillers or surgery. We find that our patients trust our professional judgment and appreciate our honesty, knowing that they will never leave our office looking ‘overdone.’ Our goal is to help our patients achieve and maintain their aesthetic goals naturally for many years to come.”

### What is the most important aspect of facial plastic surgery?

“It is not the device, type of injectable filler or type of surgery that determines the outcome of treatment. The most important aspect of any aesthetic treatment is making sure that you choose your facial plastic surgeon carefully based on their experience, skill, knowledge, board certification and ultimately their natural artistic vision.”
